Expecting a visitor?

Let the gate know before they arrive.

1. Pre-approve guests in the app; they get a code to show at the gate.
2. For a walk-in visitor, the guard asks you in the app - approve or decline.
3. Deliveries can be left at the gate when you are away.
4. Add your daily help once, so they come and go without a call.

In an emergency, use the SOS button in the app or call the security desk.
