Something to fix?

Raise a request in the app instead of waiting at the office.

1. Open Help Desk in the app and raise a request; add a photo if it helps.
2. Choose the category - plumbing, electrical, lift, cleaning and more.
3. Track it: you are told when it is taken up and when it is done.
4. Rate the work once the request is closed.

Common areas too: report a broken light or a leak on any floor.
